Art Unit: 1742

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hamajima et al.

Hamajima et al. disclose the invention substantially as claimed. Hamajima et al. disclose at Example 1 a process for forming a composite material comprising:

forming a mixture of a metal powder and a reinforcing material;

placing aluminum in contact with the mixture;

heating the aluminum to 800°C and infiltrating the mixture to form an intermetallic reinforced composite.

Hamajima et al. further disclose wherein the amount of reinforcing material is 3-30% by vol. (col. 5, lines 49-52) and the amount of intermetallic is 10-40% by vol., allowing for a matrix amount of 30-87% by vol., which falls into the range as claimed by Applicant. The Examiner understands the ratio as claimed by Applicant is aluminum to intermetallic and is not the overall ratio within the composite, since the composite further contains reinforcing material in an amount to 3-30% by volume.
